ACTEL PARTNER PROGRAM WELCOMES AXELSYS

*-- Axelsys Joins,
Provides Electronic Product Development and Contract Manufacturing Expertise --*

FREMONT, CA – JULY 2X, 2010 – Axelsys LLC, a Silicon Valley-based contract electronic design services company specializing in leading edge embedded electronic product development and contract manufacturing, has joined the Actel Partner Program. The Actel Partner program is a cooperative effort between Actel and independent providers of FPGA design services, IP, embedded software or hardware products or services that support Actel FPGA devices. The program’s purpose is to provide engineers designing with Actel FPGAs access to design resources, expertise, products and services from Actel Partners worldwide.

Axelsys will leverage its expertise within the consumer electronics, communications, defense, industrial and scientific markets to expand the range of products into which Actel devices are designed.

“Actel is a recognized leader in flash based FPGAs,” said Jay Aggarwal, CEO of Axelsys. “Axelsys looks forward to deepening its relationship with Actel and its customers and implementing cutting edge designs using the latest products from Actel, such as the SmartFusion intelligent mixed signal FPGAs.”

“The Actel Partner program is an integral part of the overall Actel experience,” said Rich Kapusta, vice president of marketing and business development at Actel. “With the addition of Axelsys to our Partner Program, our customers in the consumer electronics, defense and

industrial markets will have greater breadth of support from design to manufacturing.”

About Axelsys LLC

Axelsys is a leading Contract Electronic Design Services company with offices in Silicon Valley, CA and Shanghai, China. Axelsys services include PCB, FPGA, DSP, Embedded Software and Contract Manufacturing. Markets addressed include Consumer Electronics, Communications, Defense, Industrial and Scientific. For more information, visit www.axelsys.com

About Actel

Actel is the leader in low power FPGAs and mixed signal FPGAs, offering the most comprehensive portfolio of system and power management solutions. Power Matters. Learn more at www.actel.com.
